CONTENTS OF VOLUME III.

XIII. JULY-AUGUST, 1895.

PAGE

Thermal Conductivity of Copper. II. *R. W. Quick, C. D. Child, and B. S. Lanphear* 1
On Ternary Mixtures. I. *Wilder D. Bancroft* 21
On the Secular Motion of a Free Magnetic Needle. II. *L. A. Bauer* 34
A Galvanometer for Photographing Alternating Current Curves. *H. J. Hotchkiss and F. E. Millis* 49
Minor Contributions: (1) Experiments with a New Polarizing Photo-chronograph as applied to the Measurement of the Velocity of Projectiles, *A. C. Crehore and G. O. Squier;* (2) Experimental Demonstration of a Law of Fluid Pressure, *W. J. Humphreys* 63
New Books: *Hertz:* Die Principien der Mechanik. *S. P. Thompson:* Elementary Lessons in Electricity and Magnetism. *Yeo:* Steam and the Marine Steam Engine . 73

XIV. SEPTEMBER-OCTOBER, 1895.

A Study of the Polarization of the Light emitted by Incandescent Solid and Liquid Surfaces. *R. A. Millikan* 81
Alternating Currents when the Electromotive Force is of a Zigzag Wave Type. *E. C. Rimmington* 100
On Ternary Mixtures. II. *W. D. Bancroft* 114
Minor Contributions: (1) On a Simple Method of Photographically Registering the Infra-red Energy Spectrum, *Knut Ångström;* (2) On the Electrolytic Conductivity of Concentrated Sulphuric Acid, *Dr. K. E. Guthe and L. J. Briggs* 137
New Books: *Helm:* Grundzüge der Mathematischen Chemie. *Ostwald's* Klassiker der Exacten Wissenschaften. *Mach:* Popular Science Lectures. Proceedings of the Electrical Society of Cornell University. *Naber:* Standard Methods in Physics and Electricity Criticised 152

XV. NOVEMBER-DECEMBER, 1895.

Variation in Electric Conductivity of Metallic Wires in Different Dielectrics. *Fernando Sanford* 161
A Study of the Polarization of the Light emitted by Incandescent Solid and Liquid Surfaces. II. *R. A. Millikan* 177
On Ternary Mixtures. III. *W. D. Bancroft* 193
On the Changes in Length produced in Iron Wires by Magnetization. *L. T. More* . 210
Notes: Eli W. Blake; The American Association for the Advancement of Science . 226
Minor Contributions: (1) The Limits of Pitch for the Human Voice, *W. LeConte Stevens;* (2) The New Physics Laboratory at Lille, *E. L. Nichols* 230
New Books: *Hertz:* Electric Waves. *Glazebrook:* Mechanics 234

XVI. JANUARY–FEBRUARY, 1896.

PAGE

On the Photometry of Differently Colored Lights and the "Flicker" Photometer. *Frank P. Whitman* 241

The Chemical Potential of the Metals. *Wilder D. Bancroft* 250

On the Freezing-points of Dilute Aqueous Solutions. *E. H. Loomis* 270

Minor Contributions: (1) Some Questions in Regard to the Author's Method of Measuring Freezing-points of Dilute Solutions, *E. H. Loomis;* (2) A Comparison of Two Concave Rowland Gratings, *Alice H. Bruère;* (3) A New Apparatus for the Study of Color Phenomena, *Ernest R. von Nardroff;* (4) On a New Form of Water Battery, *L. W. Austin and C. B. Thwing* 293

New Books: *Daniell:* Principles of Physics. *Whetham:* Solution and Electrolysis. *S. P. Thompson:* Polyphase Motors. *Palaz:* Industrial Photometry. *Walter:* Oberflächenfarben. *Clerke:* The Herschels and Modern Astronomy 311

XVII. MARCH–APRIL, 1896.

On the Viscosity of Certain Salt Solutions. *B. E. Moore* 321

Notes on the Theory of Oscillating Currents. *Charles Proteus Steinmetz* 335

An Experimental Study of Induction Phenomena in Alternating Current Circuits. *F. E. Millis* 351

Demagnetization Factors for Cylindrical Rods. *C. Riborg Mann* 359

A Photographic Study of Arc Spectra. I. *Caroline Willard Baldwin* 370

Minor Contributions: (1) The Surface Tension of Liquids, *Arthur L. Foley;* (2) The Resistance of Tin-foil as changed by Electric Waves, *C. D. Child* 381

New Books: *Lamb:* Hydrodynamics; *J. J. Thomson:* Elements of the Mathematical Theory of Electricity and Magnetism; *Story-Maskelyne:* Crystallography, a Treatise on the Morphology of Crystals; *Nipher:* Electricity and Magnetism; *Stanley:* Notes on the Nebular Theory; *Glazebrook:* Mechanics and Hydrostatics; *Menschutkin:* Analytical Chemistry; *Stevens:* Elementary Mensuration; *Nichols and Franklin:* Elements of Physics, I 390

XVIII. MAY–JUNE, 1896.

Solids and Vapors. *Wilder D. Bancroft* 401

On the Heat Effect of Mixing Liquids. *C. E. Linebarger* 418

The Influence of Heat, of the Electric Current, and of Magnetization upon Young's Modulus. *Mary Chilton Noyes* 432

A Photographic Study of Arc Spectra. II. *Caroline W. Baldwin* 448

Minor Contributions: (1) A Method for the Use of Standard Candles, *C. H. Sharp;* (2) The Graphical Representation of Magnetic Theories, *H. N. Allen;* (3) On the Alternating Current Dynamo, *W. E. Goldsborough* 458

New Books: *Roscoe and Harden:* A New View of Dalton's Atomic Theory; *Loudon and McLennan:* A Laboratory Course in Experimental Physics; *Ball:* A Primer of the History of Mathematics; *Bedell and Crehore:* Étude Analytique et Graphique des Courants Alternatifs; Theorie der Wechselströme in Analytischer und Graphischer Darstellung; *Holman:* Computation Rules and Logarithms, with Tables of Other Useful Functions; *Hornby:* A Text-book of Gas Manufacture 483
